

Fluke Hand Held DMM Pack

More for procedures for less money... Cal Lab Solutions has developed over 50 fully scripted DataSheets to calibrate the most popular Fluke multimeters. Best of all, every procedure is written per the manufacturer's manual. So, if the manufacturer's written calibration procedure is the preferred method in your lab, then this Fluke Hand Held DMM Pack is a must have.

Cal Lab Solutions strives to make our procedures the very best the industry has to offer. Each of these procedures was written around the Fluke 5500A, 5520A or 5700A and can run via GPIB or COM Port.

The total package includes a total of 59 DataSheets and retails for \$1200. This works out to less than 21 dollars per procedure. A substantial savings when compared to the cost of developing the procedures in-house or purchasing each procedure individually. Each procedure and the manufacturer's manual it was written and QA-ed to follow are listed below.
